Experience

Coding Dojo (McLean, VA)

(02/17 – current)

An immersive full stack development program focusing on Python, Ruby on Rails, and MEAN Stack. Developed a working proficiency in JavaScript, HTML, and CSS as well as a wide range of other frameworks and libraries.
- Ability to develop a web app from initial concept and design to back-end and front-end and finally to deployment
- Experienced in RESTful routes, CRUD operations, and API integration
- Knowledgeable in SQL and NoSQL ERD diagrams to establish connection between multiple datasets

Gallery Espresso (Savannah, GA)

Manager (03/12 – 2/17)

Responsible for recieving and checking in inventory, maintaining equipment, making bank deposits, picking up food deliveries and training new employees. Also managed wireless network and setup and maintainence of new equipment.

Bob & Betty's Grocery (Brooklyn, NY)

Store Manager (03/11 – 09/11)

Responsible for opening store, recieving inventory and processing deliveries. Managed store inventory through communicating with vendors for pricing and and deliveries. Closing duties of balancing tills and managing deposits.

Convergys (Savannah, GA)

SR Analyst, Business Systems (01/09 – 02/10)

Provided in depth analysis of and incorporated new functionality for cellular phone billing software code. Worked with development team testing and debugging code changes on a pre-build release schedule. Provided after hours technical support for client production environments. Facilitated client requested changes by supplying the client with necessary documentation for changes and making the requested changes for legacy and next generation billing software groups.

Verisign (Savannah, GA)

Software Engineer (06/02 – 12/08)

As a Business Objects Administrator, ensured that the reporting aspect of the billing software ran as smoothly and effectively as possible. This included troubleshooting Business Objects related issues, ensuring the correct report versions were published to requested QA and production environments. Worked with developers to resolve reporting issues. Experience using Buisness Objects XI and Crystal Reports XI.

HO Systems (Savannah, GA)

Software Engineer (12/99 – 09/01)

Provided support for Flash based online payment service. Worked closely with ASP and java developers to support online payment service. Maintained client corporate branding for online-payment service. Created Flash based demos of future products for trade shows
